DWA_09 Discussion Questions

_____

1. What problems did you encounter converting the book preview to a component?

- The problem I had was converting the book preview to a component , not knowing or having a deeper understanding can be an issue.

_____

2. What other elements make sense to convert into web components? Why?

● JavaScript code that wraps around HTML elements can be transformed into a web component. A web component is like a piece of HTML written using JavaScript that you can use again and again in different web projects. So, if there are other parts in the book app that also fit this idea, like the switch between light and dark mode, those can also be turned into web components.

_____

3. Why does keeping your HTML, CSS and JavaScript in a single file sometimes make sense?

● Keeping HTML, CSS, and JavaScript in a single file sometimes makes sense for small projects or quick prototypes, as it simplifies deployment, offers immediate loading, and provides a straightforward solution for sharing self-contained examples.
